## PROFESSIONAL SUMMARY

Computer Science graduate with practical knowledge of Data Analytics and Reporting. Skilled in Advanced Excel, SQL, Power BI (DAX, Power Query), and basic Python for data cleaning, analysis, and dashboard development. Experienced in turning raw data into clear, useful reports and visual insights. Looking for an entry-level role as a Data Analyst, MIS Executive, Reporting Analyst, or Research Analyst to contribute to data-driven teams.

## TECHNICAL SKILLS

**Data Skills:** Data Analysis, Data Cleaning & Transformation, Data Visualization, Dashboard Development, KPI Reporting, MIS Reporting, Trend Analysis

**BI & Reporting Tools:** Microsoft Power BI, DAX (Data Analysis Expressions), Power Query, Advanced Excel (VLOOKUP, XLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, Pivot Tables, Pivot Charts, Excel Dashboards, Conditional Formatting, Data Validation)

**Programming & Query:** Python (Basic), SQL, Microsoft SQL Server, MySQL

**Development Tools:** VS Code, Git, GitHub

**Soft Skills:** Analytical Thinking, Problem Solving, Attention to Detail, Team Collaboration, Communication, Time Management

## PROJECTS

**Hospital Emergency Room Dashboard** | *Advanced Excel, Power Query, Pivot Tables, Pivot Charts* | [GitHub](#)

- Built an interactive monthly Excel dashboard to track hospital KPIs — Total Patients, Wait Time, and Satisfaction Score.
- Cleaned and transformed raw patient data using Power Query for accurate reporting.
- Created Pivot Tables and Pivot Charts to analyse patient flow by age group, gender, and department.
- Added month and year slicers for dynamic filtering and easy MIS reporting.
- Summarized admission status and department referrals to support hospital management decisions.

**IPL Data Analysis 2008–2026** | *SQL Server, Excel, Power BI, DAX* | [GitHub](#)

- Collected and merged IPL match data of 19 seasons (1,243 matches, 19 teams, 60 venues) using Excel into a single clean dataset for analysis.
- Performed data cleaning using Excel — removed duplicates, standardized team names, and fixed date formats across all season files.
- Wrote SQL queries in MS SQL Server using GROUP BY, JOINS, RANK, DENSE\_RANK, CTEs, 10 Views, and 8 Stored Procedures to extract team and season insights.
- Built an interactive Power BI dashboard with 4 pages — Executive Summary, Team Analysis, Venue & City, and Player Analysis — using DAX measures.
- Found key insights: Mumbai Indians topped with 155 wins, AB de Villiers won 25 Player of the Match awards, and Mumbai hosted 187 matches across all seasons.

## EDUCATION

**NIMS University, Jaipur, Rajasthan** | Sep 2022 – May 2026 (Expected)

B.Tech in Computer Science

**Sr. Sec. School, Saran, Bihar** | Apr 2020 – Mar 2022

Intermediate (Class XII)

Percentage: 65.8%

**High School, Kaituka, Saran, Bihar** | Mar 2020

Matriculation (Class X)

Percentage: 65.8%

## CERTIFICATIONS

- Get Started Building with Power BI — Microsoft
- Data Analytics Masters 2025 — Udemy
- Business English: Basics
